A History of the Second World War in 100 Maps Jeremy Black,2020-11-18 The First World War was marked by an exceptional expansion in the use and production of military cartography. But World War II took things even further, employing maps, charts, reconnaissance, and the systematic recording and processing of geographical and topographical

information on an unprecedented scale. As Jeremy Black—one of the world’s leading military and cartographic historians—convincingly shows in this lavish full-color book, it is impossible to understand the events and outcomes of the Second World War without deep reference to mapping at all levels. In *World War II, Maps Themselves Became the Weapons*, A History of the Second World War in 100 Maps traces how military cartography developed from simply recording and reflecting history to having a decisive impact on events of a global scale. Drawing on one hundred key maps from the unparalleled collections of the British Library and other sources—many of which have never been published in book form before—Jeremy Black takes us from the prewar mapping programs undertaken by both Germany and the United Kingdom in the mid-1930s through the conflict’s end a decade later. Black shows how the development of maps led directly to the planning of the complex and fluid maneuvers that defined the European theater in World War II: for example, aerial reconnaissance photography allowed for the charting of beach gradients and ocean depths in the runup to the D-Day landings, and the subsequent troop movements at Normandy would have been impossible without the help of situation maps and photos. In the course of the conflict, both in Europe and the Pacific, the realities of climate, terrain, and logistics—recorded on maps—overcame the Axis powers. Maps also became propaganda tools as the pages of *Time* outlined the directions of the campaigns and the Allies dropped maps from their aircraft. In this thrilling and unique book, Jeremy Black blends his singular cartographic and military expertise into a captivating overview of World War II from the air, sea, and sky, making clear how fundamental maps were to every aspect of this unforgettable global conflict.

We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no

problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. <https://usgovpub.com>
