Anthropology and Economy Stephen Gudeman, 2016-01-05 Comparative and critical, Anthropology and Economy offers a uniquely cross-cultural view of economy. Using examples from market and non-market situations, the book shows how economies are built on five increasingly abstract spheres, from the house to community, commerce, finance, and meta-finance. Across these spheres, economy incorporates a tension between self-interested rationality and the mutuality of social relationships. Even when rational processes predominate, as in markets, economies rely on sociability and ritual to operate, whether as cronyism, pleas to divinities or the magical persuasions of advertising. Drawing on data and concepts from anthropology and economics, the book addresses wealth inequality, resource depletion, and environmental devastation especially in capitalism, providing an understanding of their persistence and ideas for controlling them. Given the recent financial crash, Gudeman offers a different understanding of the crisis and suggestions for achieving greater economic stability.

Owners of the Map Claudio Sopranzetti, 2018 On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

*Uranium* Peter C. Burns, Robert J. Finch, 2018-12-17 Volume 38 of *Reviews in Mineralogy* provides detailed reviews of various aspects of the mineralogy and geochemistry of uranium. We have attempted to produce a volume that incorporates most important aspects of uranium in natural systems, while providing some insight into important applications of uranium mineralogy and geochemistry to environmental problems. The result is a blend of perspectives and themes: historical

(Chapter 1), crystal structures (Chapter 2), systematic mineralogy and paragenesis (Chapters 3 and 7), the genesis of uranium ore deposits (Chapters 4 and 6), the geochemical behavior of uranium and other actinides in natural fluids (Chapter 5), environmental aspects of uranium such as microbial effects, groundwater contamination and disposal of nuclear waste (Chapters 8, 9 and 10), and various analytical techniques applied to uranium-bearing phases (Chapters 11-14). This volume was written in preparation for a short course by the same title, sponsored by the Mineralogical Society of America, October 22 and 23, 1999 in Golden, Colorado, prior to MSA's joint annual meeting with the Geological Society of America.

**Collectio Mineralium** Annarita Franza, Johannes Mattes, Giovanni Pratesi, 2022-02-24 This work is the critical edition of the catalog of Holy Roman Emperor Leopold's II mineralogical collection. The volume, unpublished and preserved at the Historical Archives of the University of Firenze Museum System, dates to 1765 and describes 242 mineralogical specimens coming primarily from the current Slovak-Hungarian mining district. This edition gives the transcription of the German manuscript and its translation into English together with an organized system of notation to illustrate the complex history of the text, the characterization of the mineralogical species, and the geographical location of the mineral extraction sites. This work represents to date the only published catalog of a mineralogical collection belonging to a member of the Habsburg-Lorraine family.

*Environment and Society* Paul Robbins, John G. Hintz, Sarah A. Moore, 2022-03-17 A comprehensive yet accessible introduction to the conceptual tools used to explore real-world environmental problems *Environment and Society: A Critical Introduction*, Third Edition demonstrates how theoretical approaches such as environmental ethics, political economy, and social construction work as conceptual tools to identify and clarify contemporary environmental issues. Assuming no background knowledge in the subject, this reader-friendly textbook uses clear language and engaging examples to first describe nine key conceptual tools, and then apply them to a variety of familiar objects—from bottled water and French fries to trees, wolves, and carbon dioxide. Throughout the text, highly accessible chapters provide insight into the relationship between the environment and present-day society. Divided into two parts, the text begins by explaining major theoretical approaches for interpreting the environment-society relationship and discussing different perspectives about environmental problems. Part II examines a series of objects, each viewed through a sample of the theoretical tools from Part I, helping readers think critically about critical environmental topics such as deforestation, climate change, the global water supply, and hazardous e-waste. This fully revised third edition stresses a wider range of competing ways of thinking about environmental issues and features additional cases studies, up-to-date conceptual understandings, and new chapters in Part I on racialized environments and feminist approaches. *Environment and Society: A Critical Introduction*, Third Edition: Covers theoretical lenses such as commodities, environmental ethics, and risks and hazards, and applies them to touchstone environment-society objects like wolves, tuna, trees, and carbon dioxide Uses a conversational narrative to explain key

historical events, topical issues and policies, and scientific concepts Features substantial revisions and updates, including new chapters on feminism and race, and improved maps and illustrations Includes a wealth of in-book and online resources, including exercises and boxed discussions, chapter summaries, review questions, references, suggested readings, an online test bank, and internet links Provides additional instructor support such as suggested teaching models, full-color PowerPoint slides, and supplementary teaching material Retaining the innovative approach of its predecessors, *Environment and Society: A Critical Introduction*, Third Edition remains the ideal textbook for courses in environmental issues, environmental science, and nature and society theory.

**Personalist Economics** Edward J. O'Boyle, 2013-03-14 *Personalist Economics: Moral Convictions, Economic Realities, and Social Action* examines the nature of the worker and consumer from a personalist perspective, comparing that body of knowledge to what is received from conventional economics. A running theme throughout this book is that personalist economics is attentive to both aspects of human material need - physical need and the need for work as such - in a way that does not disregard human wants. Accordingly, this book is more concerned about the philosophical base and description of the economy's significant characteristics than social economic policy. *Personalist Economics* explores four dimensions of particularly acute human physical need: unemployment, poverty, homelessness, and death. In addressing these four aspects of need, the book delves into the second and third domains of social economics: description of the significant characteristics of the economy, and social economic policy. In the same way, *Personalist Economics* explores two types of economic cooperation - supra-firm alliances and inter-firm partnerships - as means for addressing certain aspects of human material need. This book concludes with a lengthy discussion of the challenges facing personalist economics in the years ahead.

*The Jevons Paradox and the Myth of Resource Efficiency Improvements* Blake Alcott, Mario Giampietro, Kozo Mayumi, John Polimeni, 2012-04-27 The Jevons Paradox, which was first expressed in 1865 by William Stanley Jevons in relation to use of coal, states that an increase in efficiency in using a resource leads to increased use of that resource rather than to a reduction. This has subsequently been proved to apply not just to fossil fuels, but other resource use scenarios. For example, doubling the efficiency of food production per hectare over the last 50 years (due to the Green Revolution) did not solve the problem of hunger. The increase in efficiency increased production and worsened hunger because of the resulting increase in population. The implications of this in today's world are substantial. Many scientists and policymakers argue that future technological innovations will reduce consumption of resources; the Jevons Paradox explains why this may be a false hope. This is the first book to provide a historical overview of the Jevons Paradox, provide evidence for its existence and apply it to complex systems. Written and edited by world experts in the fields of economics, ecological economics, technology and the environment, it explains the myth of efficiency and explores its implications for resource usage (particularly oil). It is a must-read for policymakers, natural resource managers, academics and students concerned with the effects of efficiency on

resource use.
