Assessment and Control represents the Proceedings of the Twentieth Easter School in Agricultural Science, held at the University Of Nottingham in 1973. The book explores the theme of heat loss, beginning with statements about physical principles and progressing through a review of physiological and behavioral knowledge to a final session on a few of the economic implications of attempting to control human and animal environments. A final chapter focusing on the topic of thermal neutrality, where all participants were asked to comment on is added to the Proceedings in an attempt to reach a common view on this controversial matter. Physicists, physiologists, and agriculturists will find the text interesting.

Textiles and Gender in Antiquity Mary Harlow,Cecile Michel,Louise Quillien,2020-11-12 This volume looks at how the issues of textiles and gender intertwine across three millennia in antiquity and examines continuities and differences across time and space - with surprising resonances for the modern world. The interplay of gender, identity, textile production and use is notable on many levels, from the question of who was involved in the transformation of raw materials into fabric at one end, to the wearing of garments and the construction of identity at the other. Textile production has often been considered to

follow a linear trajectory from a domestic (female) activity to a more 'commercial' or 'industrial' (male-centred) mode of production. In reality, many modes of production co-existed and the making of textiles is not so easily grafted onto the labour of one sex or the other. Similarly, textiles once transformed into garments are often of 'unisex' shape but worn to express the gender of the wearer. As shown by the detailed textual source material and the rich illustrations in this volume, dress and gender are intimately linked in the visual and written records of antiquity. The contributors show how it is common practice in both art and literature not only to use particular garments to characterize one sex or the other, but also to undermine characterizations by suggesting that they display features usually associated with the opposite gender.

**The Art of Cloth in Mughal India** Sylvia Houghteling,2022-03-29 When a rich man in seventeenth-century South Asia enjoyed a peaceful night's sleep, he imagined himself enveloped in a velvet sleep. In the poetic imagination of the time, the fine dew of early evening was like a thin cotton cloth from Bengal, and woolen shawls of downy pashmina sent by the Mughal emperors to their trusted noblemen approximated the soft hand of the ruler on the vassal's shoulder. Textiles in seventeenth-century South Asia represented more than cloth to their makers and users. They simulated sensory experience, from natural, environmental conditions to intimate, personal touch. *The Art of Cloth in Mughal India* is the first art historical account of South Asian textiles from the early modern era. Author Sylvia Houghteling resurrects a truth that seventeenth-century world citizens knew, but which has been forgotten in the modern era: South Asian cloth ranked among the highest forms of art in the global hierarchy of luxury goods, and had a major impact on culture and communication. While studies abound in economic history about the global trade in Indian textiles that flourished from the seventeenth to the nineteenth centuries, they rarely engage with the material itself and are less concerned with the artistic-and much less the literary and social-significance of the taste for cloth. This book is richly illustrated with images of textiles, garments, and paintings that are held in little-known collections and have rarely, if ever, been published. Rather than rely solely on records of European trading companies, Houghteling draws upon poetry in local languages and integrates archival research from unpublished royal Indian inventories to tell a new history of this material culture, one with a far more balanced view of its manufacture and use, as well as its purchase and trade--

The Time Traveler's Guide to Restoration Britain: A Handbook for Visitors to the Seventeenth Century: 1660-1699 Ian

Mortimer,2017-04-11 The past is another country - this is your guidebook, from nationally bestselling author of The Time Traveler's Guide to Medieval England. Imagine you could see the smiles of the people mentioned in Samuel Pepys's diary, hear the shouts of market traders, and touch their wares. How would you find your way around? Where would you stay? What would you wear? Where might you be suspected of witchcraft? Where would you be welcome? This is an up-close-and-personal look at Britain between the Restoration of King Charles II in 1660 and the end of the century. The last witch is sentenced to death just two years before Isaac Newton's Principia Mathematica, the bedrock of modern science, is published. Religion still has a severe grip on society and yet some—including the king—flout every moral convention they can find. There are great fires in London and Edinburgh; the plague disappears; a global trading empire develops. Over these four dynamic decades, the last vestiges of medievalism are swept away and replaced by a tremendous cultural flowering. Why are half the people you meet under the age of twenty-one? What is considered rude? And why is dueling so popular? Mortimer delves into the nuances of daily life to paint a vibrant and detailed picture of society at the dawn of the modern world as only he can.
