Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Gender and Forests Carol J. Pierce Colfer, Bimbika Sijapati Basnett, Marlène Elias, 2016-04-14 This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes. Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

The Feminist Dollar Phyllis A. Katz, Margaret Katz, 2013-11-11 Among the almost 400 companies covered here that make and market the products you buy and use every day, you will discover which promote women, have generous childcare or family leave policies, or contribute to organizations that benefit women, so that you can apply economic pressure where it can make a difference. Also, you will find the FEM - feminist evaluation measure - ratings of some of the states and countries to which you might travel.

Living Our Cultures, Sharing Our Heritage Aron A. Crowell, Rosita Worl, Paul C. Ongtooguk, Dawn D. Biddison, 2010-05-18 *Living Our Cultures, Sharing Our Heritage: The First Peoples of Alaska* features more than 200 objects representing the masterful artistry and design traditions of twenty Alaska Native peoples. Based on a collaborative exhibition created by Alaska Native communities, the Smithsonian's National Museum of Natural History, the Smithsonian's National Museum of the American Indian, and the Anchorage Museum at Rasmuson Center, this richly illustrated volume celebrates both the long-awaited return of ancestral treasures to their native homeland and the diverse cultures in which they were created. Despite the North's transformation through globalizing change, the objects shown in these pages are interpretable within ongoing cultural frames, articulated in languages still spoken. They were made for a way of life on the land that is carried on today throughout Alaska. Dialogue with the region's First Peoples evokes past meanings but focuses equally on contemporary values, practices, and identities. Objects and narratives show how each Alaska Native nation is unique—and how all are connected. After introductions to the history of the land and its people, universal themes of “Sea, Land, Rivers,” “Family and Community,” and “Ceremony and Celebration” are explored referencing exquisite masks, parkas, beaded garments, basketry,

weapons, and carvings that embody the diverse environments and practices of their makers. Accompanied by traditional stories and personal accounts by Alaska Native elders, artists, and scholars, each piece featured in *Living Our Cultures, Sharing Our Heritage* evokes both historical and contemporary meaning, and breathes the life of its people.

Gold Rush Manliness Christopher Herbert, 2018-10-31 The mid-nineteenth-century gold rushes bring to mind raucous mining camps and slapped-together cities populated by carousing miners, gamblers, and prostitutes. Yet many of the white men who went to the gold fields were products of the Victorian era: educated men who valued morality and order. Examining the closely linked gold rushes in California and British Columbia, historian Christopher Herbert shows that these men worried about the meaning of their manhood in the near-anarchic, ethnically mixed societies that grew up around the mines. As white gold rushers emigrated west, they encountered a wide range of people they considered inferior and potentially dangerous to white dominance, including Latin American, Chinese, and Indigenous peoples. The way that white miners interacted with these groups reflected their conceptions of race and morality, as well as the distinct political principles and strategies of the US and British colonial governments. The white miners were accustomed to white male domination, and their anxiety to continue it played a central role in the construction of colonial regimes. In addition to renovating traditional understandings of the Pacific Slope gold rushes, Herbert argues that historians' understanding of white manliness has been too fixated on the eastern United States and Britain. In the nineteenth century, popular attention largely focused on the West. It was in the gold fields and the cities they spawned that new ideas of white manliness emerged, prefiguring transformations elsewhere.

The Death of Expertise Tom Nichols,2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

Critical Ecofeminism Greta Gaard,2017-06-16 Australian feminist philosopher Val Plumwood coined the term “critical ecofeminism” to “situate humans in ecological terms and non-humans in ethical terms,” for “the two tasks are interconnected, and cannot be addressed properly in isolation from each other.” Various using the terms “critical ecological feminism,” “critical anti-dualist ecological feminism,” and “critical ecofeminism,” Plumwood’s work developed amid a range of perspectives describing feminist intersections with ecopolitical issues—i.e., toxic production and toxic wastes, indigenous sovereignty, global economic justice, species justice, colonialism and dominant masculinity. Well over a decade before the

emergence of posthumanist theory and the new materialisms, Plumwood's critical ecofeminist framework articulates an implicit posthumanism and respect for the animacy of all earthothers, exposing the linkages among diverse forms of oppression, and providing a theoretical basis for further activist coalitions and interdisciplinary scholarship. Had Plumwood lived another ten years, she might have described her work as "Anthropocene Ecofeminism," "Critical Material Ecofeminism," "Posthumanist Anticolonial Ecofeminism"—all of these inflections are present in her work. Here, Critical Ecofeminism advances upon Plumwood's intellectual, activist, and scholarly work by exploring its implications for a range of contemporary perspectives and issues—critical animal studies, plant studies, sustainability studies, environmental justice, climate change and climate justice, masculinities and sexualities. With the insights available through a critical ecofeminism, these diverse eco-justice perspectives become more robust.

About Time Andrew Bolton, Jan Glier Reeder, Jessica Regan, Amanda Garfinkel, Theodore Martin, Michael Cunningham, 2020-06-15 "An hour, once it lodges in the queer element of the human spirit, may be stretched to fifty or a hundred times its clock length; on the other hand, an hour may be accurately represented on the timepiece of the mind by one second." —Virginia Woolf, *Orlando: A Biography*, 1928 *About Time: Fashion and Duration* traces the evolution of fashion, from 1870 to the present, through a linear timeline of iconic garments, each paired with an alternate design that jumps forward or backward in time. These unexpected pairings, which relate to one another through shape, motif, material, pattern, technique, or decoration, create a unique and disruptive fashion chronology that conflates notions of past, present, and future. Virginia Woolf serves as "ghost narrator": excerpts from her novels reflect on the passage of time with each subsequent plate pairing. A new short story by Michael Cunningham, winner of the Pulitzer Prize for Fiction for *The Hours*, recounts a day in the life of a woman over a time span of 150 years through her changing fashions. Scholar Theodore Martin analyzes theoretical responses to the nature of time, underscoring that time is not simply a sequence of historical events. And fashion photographer Nicholas Alan Cope illustrates 120 fashions with sublime black and-white photography. This stunning book reveals fashion's paradoxical connection to linear notions of time.
