*Sexual Harassment of Women* National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

**It Was All a Dream** Reniqua Allen, 2019-01-08 Young Black Americans have been trying to realize the promise of the American Dream for centuries and coping with the reality of its limitations for just as long. Now, a new generation is pursuing success, happiness, and freedom -- on their own terms. In *It Was All a Dream*, Reniqua Allen tells the stories of Black millennials searching for a better future in spite of racist policies that have closed off traditional versions of success. Many watched their parents and grandparents play by the rules, only to sink deeper and deeper into debt. They witnessed

their elders fight to escape cycles of oppression for more promising prospects, largely to no avail. Today, in this post-Obama era, they face a critical turning point. Interweaving her own experience with those of young Black Americans in cities and towns from New York to Los Angeles and Bluefield, West Virginia to Chicago, Allen shares surprising stories of hope and ingenuity. Instead of accepting downward mobility, Black millennials are flipping the script and rejecting White America's standards. Whether it means moving away from cities and heading South, hustling in the entertainment industry, challenging ideas about gender and sexuality, or building activist networks, they are determined to forge their own path. Compassionate and deeply reported, *It Was All a Dream* is a celebration of a generation's doggedness against all odds, as they fight for a country in which their dreams can become a reality.

*Geno* Geno Auriemma, Jackie MacMullan, 2008-12-14 Controversial, confrontational, and driven, Coach Geno Auriemma is a force to be reckoned with -- and the most accomplished male coach in women's basketball today. In his relentless quest for excellence at the University of Connecticut, he has led the Huskies to five national championships. Yet his soul never rests. For Auriemma, life affords only the briefest moments of happiness -- a good round of golf, forty minutes of great basketball, a day at the beach with his family, a nice glass of wine -- while disaster is seemingly always waiting to strike. It's a fatalistic philosophy, a remnant of his hardscrabble early years, but it's an outlook that has driven him to unparalleled success. In this deeply personal memoir, Geno Auriemma reveals for the first time the man behind the legend. He talks candidly about his coaching style, famed for being one of the most demanding in all the sports world. He spills the beans about his stormy dealings with other coaches such as his archrival, Pat Summitt, of the University of Tennessee. And with warmth and a genuine love for his champions, he writes openly about Diana Taurasi, Sue Bird, Nykesha Sales, Rebecca Lobo, Swin Cash, and all of his other UConn stars who have gone on to stellar WNBA careers. You get a courtside seat to all of the action -- including an epilogue on the 2004-05 season, as well as interviews with the team's most celebrated players. A rare look inside the soul of a true competitor, *GENO* is the story of how one passionate man overcame his own fears to achieve an extraordinary record of success.

*Textiles and Gender in Antiquity* Mary Harlow, Cecile Michel, Louise Quillien, 2020-11-12 This volume looks at how the issues of textiles and gender intertwine across three millennia in antiquity and examines continuities and differences across time and space -- with surprising resonances for the modern world. The interplay of gender, identity, textile production and use is notable on many levels, from the question of who was involved in the transformation of raw materials into fabric at one end, to the wearing of garments and the construction of identity at the other. Textile production has often been considered to follow a linear trajectory from a domestic (female) activity to a more 'commercial' or 'industrial' (male-centred) mode of production. In reality, many modes of production co-existed and the making of textiles is not so easily grafted onto the labour of one sex or the other. Similarly, textiles once transformed into garments are often of 'unisex' shape but worn to express the

gender of the wearer. As shown by the detailed textual source material and the rich illustrations in this volume, dress and gender are intimately linked in the visual and written records of antiquity. The contributors show how it is common practice in both art and literature not only to use particular garments to characterize one sex or the other, but also to undermine characterizations by suggesting that they display features usually associated with the opposite gender.

**Writing on Ice** Vilhjalmur Stefansson, 2001 Between 1906 and 1918, anthropologist and explorer Vilhjalmur Stefansson went on three long expeditions to the Alaskan and Canadian Arctic. He wrote voluminously about his travels and observations, as did others. Stefansson's fame was partly fueled by a series of controversies involving envious competitors in the race for public recognition. While many anthropological works refer to his writings and he continues to be cited in ethnographic and historical works on indigenous peoples of the North American Arctic, particularly the Inuit, his successes in exploration (the discovery and mapping of some of the last remaining land on earth) have overshadowed his anthropological work. *Writing on Ice* utilizes his extensive fieldwork diaries, now in Dartmouth's Special Collections, and contemporary photographs and sketches, some never before published, to bring to life the anthropology of the Arctic explorer. Gísli Pálsson situates the diaries in the context of that era's anthropological practice, early 20th-century expeditionary power relations, and the North American community surrounding Stefansson. He also examines the tension between the rhetoric of ethnography and exploration (the notion of the friendly Arctic) and the reality of fieldwork and exploration, partly with reference to Stefansson's silence about his Inuit family.

**Gender and Forests** Carol J. Pierce Colfer, Bimbika Sijapati Basnett, Marlène Elias, 2016-04-14 This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes.

Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

Women's Rights in the Middle East and North Africa Sanja Kelly, Julia Breslin, 2010-07-16 Freedom House  
Os innovative publication *Women's Rights in the Middle East and North Africa: Progress Amid Resistance* analyzes the status of women in the region, with a special focus on the gains and setbacks for women's rights since the first edition was released in 2005. The study presents a comparative evaluation of conditions for women in 17 countries and one territory: Algeria, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine (Palestinian Authority and Israeli-Occupied Territories), Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen. The publication identifies the causes and consequences of gender inequality in the Middle East, and provides concrete recommendations for national and international policymakers and implementers. Freedom House is an independent nongovernmental organization that supports democratic change, monitors freedom, and advocates for democracy and human rights. The project has been embraced as a resource not only by international players like the United Nations and the World Bank, but also by regional women's rights organizations, individual activists, scholars, and governments worldwide. Women's rights in each country are assessed in five key areas: (1) Nondiscrimination and Access to Justice; (2) Autonomy, Security, and Freedom of the Person; (3) Economic Rights and Equal Opportunity; (4) Political Rights and Civic Voice; and (5) Social and Cultural Rights. The methodology is based on the Universal Declaration of Human Rights, and the study results are presented through a set of numerical scores and analytical narrative reports.

**Feminist Global Health Security** Clare Wenham, 2021  
Global health security, focused on a firefighting short-term response efforts fail to consider the differential impacts of outbreaks on women. For example, the policy response to the Zika outbreak centred on limiting the spread of the vector through civic participation and asking women to defer pregnancy. Both actions are inherently gendered and reveal a distinct lack of consideration of the everyday lives of women. These policies placed women in a position whereby were blamed if they had a child born with Congenital Zika Syndrome, and at the same time governments required women to undertake invisible labour for vector control. What does this tell us about the role of women in global health security? This feminist critique of the Zika outbreak, argues that global health security has thus far lacked a substantive feminist engagement, with the result that the very policies created to manage an outbreak of disease

disproportionately fail to protect women. Women are both differentially infected and affected by epidemics. Yet, the dominant policy narrative of global health security has created pathways which focus on protecting the international spread of disease to state economies, rather than protecting those who are most at risk. As such, the state-based structure of global health security provides the fault-line for global health security and women. This book highlights the ways in which women are disadvantaged by global health security policy, through engagement with feminist security studies concepts of visibility; social and stratified reproduction; intersectionality; and structural violence. It argues that it was no coincidence that poor, black women living in low quality housing were the most affected by the Zika outbreak and will continue to be so, until global health security is gender mainstreamed. More broadly, I ask what would global health policy look like if it were to take gender seriously, and how would this impact global disease control sustainability?--

*Utopian Episodes* Seymour R. Kesten,1996-05-01 Decades before the communes of the sixties, nineteenth-century radicals set up isolated colonies where they hoped to insulate themselves from a corrupt mainstream America. Throughout the country, experimental utopian settlements promised to fulfill the lives of ordinary citizens through abundance, equality, and free education. *Utopian Episodes* tells why these early, freethinking rebels could never fully achieve their goals, but how their legacy has become an integral part of today's movement for social reform.

Harassed Rebecca Hanson,Patricia Richards,2019-05-29 Researchers frequently experience sexualized interactions, sexual objectification, and harassment as they conduct fieldwork. These experiences are often left out of ethnographers' "tales from the field" and remain unaddressed within qualitative literature. *Harassed* argues that the androcentric, racist, and colonialist epistemological foundations of ethnographic methodology contribute to the silence surrounding sexual harassment and other forms of violence. Rebecca Hanson and Patricia Richards challenge readers to recognize how these attitudes put researchers at risk, further the solitude experienced by researchers, lead others to question the validity of their work, and, in turn, negatively impact the construction of ethnographic knowledge. To improve methodological training, data collection, and knowledge produced by all researchers, *Harassed* advocates for an embodied approach to ethnography that reflexively engages with the ways in which researchers' bodies shape the knowledge they produce. By challenging these assumptions, the authors offer an opportunity for researchers, advisors, and educators to consider the multiple ways in which good ethnographic research can be conducted. Beyond challenging current methodological training and mentorship, *Harassed* opens discussions about sexual harassment and violence in the social sciences in general.

**Conflicts of Fitness: Islam, America, and Evolutionary Psychology** A.S. Amin,2015-12-08 In *Conflicts of Fitness: Islam, America, and Evolutionary Psychology*, A.S. Amin examines various aspects of Islamic tradition through a Darwinian

framework. Islam's allowance of polygamy, the underlying reasons for the subordination of women in many Muslim societies, and the seeds of political instability and terrorism in the Muslim world are just a few of the important issues this book addresses. Amin also offers original insight into many aspects of American society and history. Through the filter of biologically based theories, he explores the reasons behind the monumental changes in sexual mores that have occurred in the United States over the past century, the underpinnings of feminism, and the differences between liberals and conservatives. This text also analyzes the lyrics of many famous rappers, in the belief that hip-hop has arguably become the most influential form of cultural expression in America today. An astute and entertaining work that compares and contrasts American culture with that of the Muslim world from a perspective inspired by evolutionary psychology, *Conflicts of Fitness* presents many thought-provoking tools to those in search of greater understanding of these two dynamic cultures and worlds.
