**Shock Waves** Stephane Hallegatte, Mook Bangalore, Laura Bonzanigo, Marianne Fay, Tamaro Kane, Ulf Narloch, Julie Rozenberg, David Treguer, Adrien Vogt-Schilb, 2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

**Saving Us** Katharine Hayhoe, 2022-09-20 United Nations Champion of the Earth, climate scientist, and evangelical Christian Katharine Hayhoe changes the debate on how we can save our future in this nationally bestselling “optimistic view on why collective action is still possible—and how it can be realized” (The New York Times). Called “one of the nation’s most effective communicators on climate change” by The New York Times, Katharine Hayhoe knows how to navigate all sides of the conversation on our changing planet. A Canadian climate scientist living in Texas, she negotiates distrust of data, indifference to imminent threats, and resistance to proposed solutions with ease. Over the past fifteen years Hayhoe has found that the most important thing we can do to address climate change is talk about it—and she wants to teach you how. In *Saving Us*, Hayhoe argues that when it comes to changing hearts and minds, facts are only one part of the equation. We need to find shared values in order to connect our unique identities to collective action. This is not another doomsday narrative about a planet on fire. It is a multilayered look at science, faith, and human psychology, from an icon in her field—recently named chief scientist at The Nature Conservancy. Drawing on interdisciplinary research and personal stories, Hayhoe shows that small conversations can have astonishing results. *Saving Us* leaves us with the tools to open a dialogue with your loved ones about how we all can play a role in pushing forward for change.

Climate Change and Growth in Asia Moazzem Hossain, Antony Selvanathan, 2011-01-01 Climate Change and Growth in Asia is a comprehensive analysis of the major issues of climate change and global warming and their possible impacts on the growth of major Asian economies. The book addresses the climate change crisis in Asia within the context of three major challenges of growth: population, poverty and greenhouse gas emissions.

Laudato Si Pope Francis, 2015-07-18 "In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" – Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si'*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." *Laudato Si'* outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

Renewable Energy Sources and Climate Change Mitigation Ottmar Edenhofer, Ramón Pichs Madruga, 2012 This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector and academic researchers.

*An Introduction to Sustainable Development* Peter P. Rogers, Kazi F. Jalal, John A. Boyd, 2012 This volume is the most comprehensive textbook on sustainable development. It has been developed with students and professionals from around the world specifically for those who need a thorough grounding in the subject. Coverage includes: background to sustainable development and global environmental issues; measurement and sustainability indicators; environmental assessment, management and policy; approaches and linkages to poverty reduction; impacts and infrastructure development; economics,

consumption, production and market failures; governance; participation; disaster management; international financial institutions; international environmental agreements; and the role of civil society.

**Global Trends 2040** National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

*The Ocean and Cryosphere in a Changing Climate* Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

**The Bottom Rail** James Walter Daniel, 1915

**Building Bottom-up Health and Disaster Risk Reduction Programmes** Emily Ying Yang Chan, 2017-12-01 As a backdrop of the Sustainable Development Goals (SDGs) (2016-2030), the United Nations pointed out that more than 6 million children still died before the age of five by 2015. At least 1.8 billion people across the world still consumed fecally contaminated drinking water and 2.4 million lacked access to basic sanitation services such as toilets or latrines, while nearly 1,000 children died every day of preventable water and sanitation-related diarrhoeal diseases. Rural areas fare far worse: Children in rural areas are about 1.7 times more likely to die before their fifth birthday as those in urban areas. About 16 per

cent of the rural population do not use improved drinking water sources, compared to 4 per cent of the urban population. About 50 per cent of people living in rural areas lack improved sanitation facilities, compared to only 18 per cent of people in urban areas. Far too many one-off rural on-site public health knowledge transfer projects fail to deliver results in the long run, and the knowledge in question cannot be retained in the rural communities after the NGO and development workers are gone. In addition to external constraints, this is often due to a lack of theoretical understanding among NGO practitioners and volunteers and basis for evaluation and improvement of health relief programmes. Based on public health theories and illustrated by relevant examples, this book introduces how health, emergency and disaster preparedness education programmes could be organised in remote rural Asia, which could become useful reference materials for organisers and volunteers of rural development projects. This book is an introductory to intermediate level textbook and reference book for healthcare professionals, fieldworkers, volunteers and students who are interested in promoting health and emergency and disaster risk reduction. The book is developed from the experience and insights gained from the long-established CCOUC Ethnic Minority Health Project in China. It also incorporates new lessons from CCOUC's recent projects in Asia countries like Bhutan, Nepal and Democratic People's Republic of Korea.

The Bottom Rung Stewart Emory Tolnay, 1999 Making revealing and innovative use of public records from the early part of the twentieth century, Stewart Tolnay challenges the widely held idea that black southern migrants to northern cities carried with them a dysfunctional family culture. He demonstrates the powerful impact of economic conditions on family life and views patterns of marriage and childbearing, not only among early twentieth-century farm families but also among contemporary urban families, as rational responses to prevailing social, economic, and political conditions.

*Unlikely Allies in the Academy* Karen L. Dace, 2012-05-23 A CHOICE Outstanding Academic Title 2012! *Unlikely Allies in the Academy* brings the voices of women of Color and White women together for much-overdue conversations about race. These well-known contributors use narrative to expose their stories, which are at times messy and always candid. However, the contributors work through the discomfort, confusion, and frustration in order to have honest conversations about race and racism. The narratives from Chicanas, Indigenous, Asian American, African American, and White women academicians explore our past, present, and future, what separates us, and how to communicate honestly in an effort to become allies. Chapters discuss the need to interrupt and disrupt the norms of interaction and engagement by allowing for the messiness of discomfort in frank discussion. The dialogues model how to engage in difficult dialogues about race and begin to illuminate the unspoken misunderstandings about how White women and women of Color engage one another. This valuable book offers strategies, ideas, and the hope for moving toward true alliances in the academy and to improve race relations. This important resource is for Higher Education administrators, faculty, and scholars grappling with the intersectionality of race and gender as they work to understand, study, and create more inclusive climates.

*Bottom Line, Personal*, 1997

**Gender and Climate Change: An Introduction** Irene Dankelman, 2012-06-25 Although climate change affects everybody it is not gender neutral. It has significant social impacts and magnifies existing inequalities such as the disparity between women and men in their vulnerability and ability to cope with this global phenomenon. This new textbook, edited by one of the authors of the seminal *Women and the Environment in the Third World: Alliance for the Future* (1988) which first exposed the links between environmental degradation and unequal impacts on women, provides a comprehensive introduction to gender aspects of climate change. Over 35 authors have contributed to the book. It starts with a short history of the thinking and practice around gender and sustainable development over the past decades. Next it provides a theoretical framework for analyzing climate change manifestations and policies from the perspective of gender and human security. Drawing on new research, the actual and potential effects of climate change on gender equality and women's vulnerabilities are examined, both in rural and urban contexts. This is illustrated with a rich range of case studies from all over the world and valuable lessons are drawn from these real experiences. Too often women are primarily seen as victims of climate change, and their positive roles as agents of change and contributors to livelihood strategies are neglected. The book disputes this characterization and provides many examples of how women around the world organize and build resilience and adapt to climate change and the role they are playing in climate change mitigation. The final section looks at how far gender mainstreaming in climate mitigation and adaptation has advanced, the policy frameworks in place and how we can move from policy to effective action. Accompanied by a wide range of references and key resources, this book provides students and professionals with an essential, comprehensive introduction to the gender aspects of climate change.

Drawdown Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described

here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

**How to Avoid a Climate Disaster** Bill Gates, 2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

*Words That Built a Nation* Marilyn Miller, Ellen Scordato, Dan Tucker, 2018-02-13 When originally published in 1999, *Words That Built a Nation* was hailed for bringing together the United States' most important historical essays, speeches, and documents into one accessible collection for kids. Now, this history lovers' must-have is back, and it's been revised, revamped, and expanded for the 21st century. From the Constitution and the Gettysburg Address to the 2015 Supreme Court ruling on same-sex marriage, the updated collection preserves the documents of the first edition and introduces the landmark statements that are impacting our nation today. With all new illustrations, a refreshed design, and complementary background information behind each of the documents, *Words That Built a Nation* is the ultimate tour of United States history, created to engage, inspire, and equip kids with the knowledge they need to change and shape their world. "This book is attractive and the presentation engaging."—School Library Journal

**Climate Change and Risk in South and Southeast Asia** Devendraraj Madhanagopal, Salim Momtaz, 2022-11-30 This book, focuses on South and Southeast Asia, upgrades our understanding of the influence of multiple sociopolitical and governance factors on climate change and risks. Moving beyond science and technology-oriented discussions on climate change, it argues that the real solutions to climate change problems lie in societies, governance systems, non-state actors, and the power and politics underpinning these systems. It presents a range of detailed conceptual, empirical, and policy-oriented insights from different nations of South and Southeast Asia, including India, Bangladesh, Sri Lanka, Indonesia, Vietnam, Maldives, and Bhutan. The chapters bring forth critical discussions of climate change, covering a diverse range of topics including livelihoods, gender, community perspectives, relocation, resilience, local politics, climate change communication, governance, and policy responses. By investigating climate change vulnerabilities and as well as offering feasible solutions to the states and other non-state actors in responding to climate change and risks, this book deepens our existing knowledge of the social and political dimensions of climate change. With interdisciplinary perspectives, this book will appeal to all students, researchers, and scholars of environmental studies, geography, disaster studies, sociology, policy studies, development studies, and political science. It provides valuable reading to practitioners, policymakers, and professionals working in related fields.

**The Sustainability Curriculum** Cedric Cullingford, John Blewitt, 2013-06-17 The links between education and sustainable development are deepening, although subject to much controversy and debate. The success of the sustainability discourse depends both on the pedagogic and research functions of higher education. Similarly, for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development, but also to be responsive to scrutiny of its own practices in relation to sustainability. Among professionals in higher education, sustainable development has its supporters and detractors. It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines. Although

it is not currently an academic discipline in its own right, increasing public and professional familiarity with the term, and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing. This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines, institutional practices, fields of study and methods of enquiry. The contributors, drawn from a wide-range of disciplines, perspectives, educational levels and institutional contexts, examine the purpose of the modern university and the nature of sustainable education, which includes exploring links to social movements for sustainability projects, curriculum change, culture and biodiversity, values relating to gender equality and global responsibility, and case studies on the transformation, or otherwise, of some specific disciplines.
