Outing and the Wheelman, 1892

Adventure Sport Physiology Nick Draper, Christopher Hodgson, 2008-11-20 "...the most comprehensive adventure sport physiology book I am aware of; therefore, I recommend it wholeheartedly." The Sport and Exercise Scientist, March 2009 This book provides students and professionals with a well-written, accessible introduction to the science underlying a variety of adventure sports. Written specifically for this increasingly popular field of study, the text has been divided into two parts: the first provides the foundations for adventure physiology, the second the specific physiological and environmental demands of a range of adventure sports including kayaking, canoeing, sailing, windsurfing, climbing, mountaineering and skiing. Written by two adventure sports performers with extensive teaching and coaching experience, this book will prove invaluable to students taking courses in adventure and outdoor education and professional instructors involved in such activities. In addition, students of sport and exercise science and physical education will find this an excellent introduction to the physiological response to exercise. Clearly explains the basic physiological principles and applies them to a variety of land and water-based sports. In full colour throughout, the book includes numerous illustrations, together with key points and chapter summaries to reinforce learning. Contains original pieces from elite and high-level athletes describing the physiological demands of their particular sport in a real-world context. These include London sports personality of the year Anna Hemmings, respected climbers Dave Macleod and Neil Gresham, and Olympic medallists Tim Brabants and Ben Ainslie. Dedicated web site contains an original sample training programme and a set of adventure sport specific exercises.
