**MySQL and Perl for the Web** Paul DuBois,2001 MySQL and Perl for the Web provides a much-needed handbook for database and Web developers seeking an extensive and detailed guide for using the combination of MySQL and Perl to build dynamic and interactive database-backed Web sites. It shows how to use Perl's DBI database access module, pairing it with the CGI.pm module that allows Web pages and forms to be generated and processed easily. These tools provide developers with a solid foundation for creating applications that incorporate database content to create dynamic, up-to-date Web sites. The book employs a practical learn-by-doing approach that demonstrates development techniques by building complete applications, not just fragmentary pieces. It shows what to do at each step of the way during the process of building live, working examples. Applications are fully explained so you can understand how they work and apply the techniques they illustrate to your own projects.

**Euro-Par 2006 Parallel Processing** Wolfgang E. Nagel,Wolfgang V. Walter,2006-08-24 This book constitutes the refereed proceedings of the 12th International Conference on Parallel Computing, Euro-Par 2006. The book presents 110 carefully reviewed, revised papers. Topics include support tools and environments; performance prediction and evaluation; scheduling and load balancing; compilers for high performance; parallel and distributed databases, data mining and knowledge discovery; grid and cluster computing; models, middleware and architectures; parallel computer architecture and instruction-level parallelism; distributed systems and algorithms, and more.

**A Grammar of Tundra Nenets** Irina Nikolaeva,2014-06-18 The book is the first substantial description of Tundra

Nenets, a highly endangered Uralic language spoken in Western Siberia and the north of European Russia, destined for the international linguistic community. Its purpose is to provide a thorough documentation of all of the major grammatical phenomena in the language. The grammar particularly emphasizes the description of syntax, because this has traditionally been a very neglected area of Nenets studies. Many syntactic aspects have not received a systematic treatment in the existing literature or have not been addressed at all. Since the existing works are not easily available, incomplete, or idiosyncratically presented, Tundra Nenets syntax has played little or no role in the considerations of modern linguists, whether more descriptively or theoretically inclined. The book is largely descriptive: it is not intended to address theoretical questions per se and the description is not meant to be formulated within a particular framework. However, it identifies and discusses issues which are of broad typological and theoretical interest. The description is richly exemplified. Most of the cited examples are the result of fieldwork conducted by the in various locations. They are sentences produced by native speakers either spontaneously or elicited in response to questions posed in Russian. Other examples are excerpts from original texts.

*Marketing and Consumer Behavior: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2014-12-31 As marketing professionals look for ever more effective ways to promote their goods and services to customers, a thorough understanding of customer needs and the ability to predict a target audience's reaction to advertising campaigns is essential. *Marketing and Consumer Behavior: Concepts, Methodologies, Tools, and Applications* explores cutting-edge advancements in marketing strategies as well as the development and design considerations integral to the successful analysis of consumer trends. Including both in-depth case studies and theoretical discussions, this comprehensive four-volume reference is a necessary resource for business leaders and marketing managers, students and educators, and advertisers looking to expand the reach of their target market.

*Automating Business Modelling* Yun-Heh Chen-Burger,Dave Robertson,2006-03-30 Enhances the use of enterprise models as an effective communication medium between business and technical personnel. Details the blue-print of the to-be developed business system.

*Bioinformatics* Shui Qing Ye,2007-08-20 An emerging, ever-evolving branch of science, bioinformatics has paved the way for the explosive growth in the distribution of biological information to a variety of biological databases, including the National Center for Biotechnology Information. For growth to continue in this field, biologists must obtain basic computer skills while computer specialists must possess a fundamental understanding of biological problems. Bridging the gap

between biology and computer science, *Bioinformatics: A Practical Approach* assimilates current bioinformatics knowledge and tools relevant to the omics age into one cohesive, concise, and self-contained volume. Written by expert contributors from around the world, this practical book presents the most state-of-the-art bioinformatics applications. The first part focuses on genome analysis, common DNA analysis tools, phylogenetics analysis, and SNP and haplotype analysis. After chapters on microarray, SAGE, regulation of gene expression, miRNA, and siRNA, the book presents widely applied programs and tools in proteome analysis, protein sequences, protein functions, and functional annotation of proteins in murine models. The last part introduces the programming languages used in biology, website and database design, and the interchange of data between Microsoft Excel and Access. Keeping complex mathematical deductions and jargon to a minimum, this accessible book offers both the theoretical underpinnings and practical applications of bioinformatics.

Adjective attribution Michael Rießler, 2016-07-15 This book is the first typological study of adjective attribution marking. Its focus lies on Northern Eurasia, although it covers many more languages and presents an ontology of morphosyntactic categories relevant to noun phrase structure in general. Beside treating synchronic data, the study contributes to historical linguistics by reconstructing the origin of new types specifically in the language contact area between the Indo-European and Uralic families.
